

Horizon Plumbing

Evaporative cooling or refrigerated air? That was the question we had to answer when we first came to the El Paso area. These terms fell on unknowing ears! Marla and Paul both hailed from areas far from the desert; either you HAD air-conditioning, or you DIDN'T! At that time, builders here were still pushing the Master Cool units - guaranteeing satisfaction if we would spring for the "high dollar" model. When we were on the "walk through" with our builder just before closing (with regard to the Master Cool operating system) she said to me, "Your husband is going to have to know his roof! I had no earthly idea what she was talking about! With his level of commitment to his job, when was Paul going to have time to do ANYTHING but work at school?

Enter Horizon Plumbing! Thanks to its owner, Wendall, our Master Cool units were turned on in the spring and made "winter ready" in the fall without a hitch! We have since converted to refrigerated air, but Wendall is always available to lend a hand when we have trouble with clogged sink and shower drains. If you find yourself in need of plumbing services, Horizon Plumbing has the equipment and honest, dependable service to support any request!
