

Sanchez Landscaping

One day, several years ago, I answered a knock at our door. There was a young teen standing there who introduced himself as Efrain and asked if we needed our yard done. We certainly DID! Efrain's father was nearby and through his limited English, and his son's translation, we struck a price for the work that needed to be done. Thus, was the beginning of a long-term business relationship with Sanchez Landscaping's owner, Raul Sanchez. With my very limited Spanish, I would call Mr. Sanchez and give him our address, and Efrain would call back for details. They would soon be on their way!

Fast-forward to the present.... Efrain is grown, and now Mr. Sanchez recruits other members of his family to join in providing services to his customers; including: landscaping, palm-trimming, painting, and rock wall repair. Now, just when I am thinking I need some help in one of these areas, I will almost always get a phone call from Sanchez Landscaping - asking if I am ready to have my yard cleaned up. Raul's English has improved exponentially, although my Spanish needs some help! However, this small company has come to play a big part in helping us take care of some of the outdoor tasks we have, as yet, had little time to accomplish! Give them a call for your landscaping, painting, or rock wall repair needs! I am sure you will be pleased with their quality service!
